0190100   Sensor - PIR 270° IP44 - White

- Multiple options for installation
- Wide detection area
- Splash waterproof

LED's light **PRO**

With this sensor you will never have to struggle in the dark again to find the right key balancing an arm full of groceries. The sensor enables you to add motion detection to your outdoor lights. Making sure that the lights turn on once movement is detected at night.

Another advantage of an outdoor light with sensor is home security. Burglars will be deterred by the sudden light.

The sensor can be installed in three ways: around corners, attached to walls and attached to ceilings. The package includes an extra corner piece.

The sensor is splash waterproof and has a wide detection angle.

Available in white and black.
